YOUR PROJECT CHARTER IS WAITING FOR YOU!

Congratulations,

Your Impact Filter has been approved and your next step must be to submit a Project Charter.

Please use this link:
https://app.smartsheet.com/b/form/2a34a2b9819d4d8ca254e748da6b164d

The PM Team will review it once submitted and they will come back to you.

Thanks for taking this initiative!
Amping,

Your PM Team :)

PROJECT NAME	Manatal Configuration Enhancement and Process Optimization
NAME	Krystal Villasin
EMAIL	krystal.villasin@smartsourcing.co
PURPOSE: What do you want to accomplish?	To To streamline and standardize recruitment, hiring, and onboarding workflows within Manatal by removing unnecessary fields, improving data structure, and enabling system features that reduce manual work, improve data accuracy, and enhance candidate and hiring manager experience.
Who are the Stakeholders	Bryan Del Castillo, Ivern Bernales, Krystal Villasin, and TA team
IMPORTANCE: What Impact will this have?	The project will reduce manual work, improve data accuracy, and standardize recruitment and hiring processes in Manatal. It will enable faster hiring decisions, more consistent candidate communication, better system adoption by recruiters, and improved visibility across job, offer, and hire stages—ultimately enhancing both recruiter efficiency and candidate experience.
OUTCOME: How does the completed project look like?	Manatal is configured with clean, standardized job and offer fields; automated and accurate hire data; self-service access for new hires; built-in offer and contract generation; and consistent, template-driven candidate communications. Recruiters can manage jobs, offers, interviews, and emails seamlessly in one system without duplicate postings, manual workarounds, or dependency on hiring managers.
BEST RESULT: What's possible if you do take action	A fully optimized and scalable ATS that enables faster, more accurate, and more consistent hiring by automating workflows, reducing manual effort, improving data integrity, and delivering a seamless experience for recruiters, hiring managers, and candidates.
WORST RESULT: What's at risk if you don't act	Continued inefficiencies due to manual workarounds, inconsistent data and candidate communication, duplicate postings, limited system adoption, slower hiring cycles, and increased risk of errors that negatively impact recruiter productivity and candidate experience.
1.	Job Details are standardized and simplified: The Job Details tab reflects the updated structure (per approved sheet), with unnecessary fields removed and required fields clearly defined.
2.	Job Descriptions are clearly sectioned: Job descriptions are consistently divided into introduction, job description, requirements, and benefits, improving readability and reuse.

3.	Hire information auto-populates correctly: When a candidate is moved to the Hired stage, their details automatically populate the Hire section under Job Summary without manual re-entry.
4.	Offer details are complete and structured: Final work schedule and salary are captured accurately, with compensation clearly broken down into base pay and three allowances.
5.	Self-service onboarding is enabled and functional New hires can independently update personal details, dependents, emergency contacts, and upload pre-employment documents within Manatal.
6.	Offer letters and contracts are system-generated: Offer and contract PDFs can be generated directly from Manatal using approved templates, eliminating manual document creation.
7.	No duplicate job postings are created: Updates to job orders do not trigger reposting or create duplicate job listings in Manatal.
8.	Candidate activity and communications are fully visible and automated: Booked interviews appear in the candidate activity log; Drop-reason–specific email templates automatically send upon disqualification; Recruiters can send emails and calendar invites under Activity using templates and Smartsourcing Global Address List
STRATEGIC ALIGNMENT	4
FINANCIAL IMPACT	4
RESOURCE AVAILABILITY	4
